

Senior technical consultants placed inside cashew processing factories — yield audits, line setup, QC compliance, and hands-on training so plants hit export grade fast.

01 WHAT WE DO

- **Comprehensive consulting & solutions**

Build and standardize a modern production management system, from raw material to finished product.

- **Bottleneck analysis & problem solving**

Diagnose technical issues, identify critical points on the line, and ensure smooth daily operations.

- **Yield optimization & profitability**

Reduce waste, lift kernel recovery rate, and keep key KPIs consistently on target.

02 WHY CAJOUX

- Vietnam-grade technical standard, adapted to local RCN and labor conditions
- Senior consultants who have run the line themselves — not junior auditors
- Multilingual by design: English, French, Mandarin, Vietnamese on every project
- Short, accountable engagements — defined scope, timeline, measurable outcome

03 AT A GLANCE

MARKETS

Africa (Ghana, Côte d'Ivoire, Benin, Tanzania, Nigeria) · Southeast Asia (Vietnam, Cambodia, Laos) · Brazil

ENGAGEMENT

3–6 months, scaled to factory size, defined scope & outcomes

TRAINING

6-step program taught on the floor: sizing -> steaming -> cutting -> drying -> peeling (testa) -> grading & packing
